01/2011

## Dear All,

since the first "IT Academy" trainings, in 2009, we received very positive feedback from participants and can proudly say that great success was achieved. We want to ensure to keep on developing and providing the best training in line with the needs of the participating companies as well as participants. Therefore, we would like to strengthen our basis for the next years.

In a meeting held by the CIOs of the "IT Academy" founders Holcim, Hilti, Omya and Schindler the following goals and statements were outlined:

- In order to ensure an independent and professional future of the "IT Academy", an association will be founded, comprising of companies and people with a strong interest in IT.
- Various aspects of the association including the organisation, the activities, the targets and financials will be presented to all members during "The General Assembly" in February/March 2012.
- One "IT Academy" week will be organised in spring 2012. If substantial interest is shown, the second session of trainings will be held in autumn 2012. The final dates for the trainings in 2012 will be posted on our website by end of this year.
- The association aims to on-board around 20 members in 2012 and expects that the current companies will sign in.
- The website [www.itacademy.ch](http://www.itacademy.ch) will be improved and uploaded with the latest but also previous information of IT trainings. All the alumni, speakers and company coordinators will be provided with a login.
- Activities and events for 2012/2013 will be reviewed and discussed at the next board meetings. The feedback from all the association members will be gathered as well.

We are wishing you a successful finish of the year 2011 and an excellent start in 2012.

With kind regards,
